

**Cover Letter: 2026 Software Engineer Program – Full-time (US)** Date: September 8, 2025

Dear Hiring Team,

I am writing to express my enthusiastic interest in the 2026 Software Engineer Program – Full-time – United States (February Start). As a Computer Science undergraduate specializing in Cyber Security, with a strong foundation in software development, cloud technologies, and machine learning, I am excited by the opportunity to contribute to a global team that values innovation, collaboration, and social impact.

Throughout my academic journey at MLRITM, I have maintained a CGPA of 9.54 while building real-world projects that reflect both technical depth and creativity. My work includes an **Online Event Planner** using Java, Spring Boot, and MySQL, and a **Driver Drowsiness Detection System** powered by CNN and OpenCV. These experiences have sharpened my skills in backend development, data pipelines, and intelligent automation — all of which I'm eager to apply in a dynamic, enterprise-scale environment.

I hold certifications in **AWS Data Engineering**, **ServiceNow**, and **Android Development**, and I'm proficient in DevOps tools such as GitHub, Docker, and Jenkins. My exposure to agile methodologies and CI/CD workflows aligns well with the program's emphasis on application resiliency and continuous improvement.

What excites me most about this opportunity is the chance to work alongside technologists from around the world, contribute to meaningful projects like Force for Good, and grow within a culture that champions diversity and innovation. I am confident that my technical skills, growth mindset, and collaborative spirit make me a strong candidate for this program.

Thank you for considering my application. I look forward to the possibility of contributing to your team and learning from the best in the industry.

Warm regards, **Jodu Vyshnavi**  [joduvyshnavi@gmail.com](mailto:joduvyshnavi@gmail.com) |  +91-6300195978 |
