

Cover Letter: Software Engineer (MLOps)

Hyderabad, Telangana

Date: 8 September 2025

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer (MLOps) position (Job No. 1872301) recently posted for your Hyderabad office. As a Computer Science undergraduate specializing in Cyber Security, with hands-on experience in full-stack development, machine learning, and cloud technologies, I am confident in my ability to contribute meaningfully to your engineering team.

My academic journey at MLRITM has been marked by a CGPA of 9.54 and a strong focus on building scalable, secure systems. I've developed projects like an **Online Event Planner** using Java, Spring Boot, and MySQL, and a **Driver Drowsiness Detection System** leveraging CNN and OpenCV — both of which reflect my ability to bridge software engineering with intelligent automation.

I hold certifications in **AWS Data Engineering**, **ServiceNow**, and **Android Development**, and I'm proficient in DevOps tools such as GitHub, Docker, and Jenkins. My exposure to cloud-native architectures and CI/CD pipelines makes me well-suited for MLOps workflows that demand both reliability and agility.

Beyond technical skills, I bring a growth mindset and a collaborative spirit. I've actively supported peers in academic and contest settings, and I thrive in environments that value innovation, measurable impact, and continuous learning.

I would welcome the opportunity to discuss how my background and enthusiasm for MLOps can align with your team's goals. Thank you for considering my application.

Warm regards, **Jodu Vyshnavi**  joduvyshnavi@gmail.com |  +91-6300195078 |
